# Inconvénients

## Dev. ABAP

---

Coûteux

Processus Long

Ne fournit pas toujours ce dont l'utilisateur a besoin

## Outils de BI

---

**Analytique mais non opérationnel**

Pas toujours à la main du Métier

Pas uniforme, parfois plusieurs outils peuvent cohabiter

Différences entre les reports de BI et les reports standard de SAP

## Excel

---

Données potentiellement obsolètes

Peu de fonctionnalités ERP standard

Non collaboratif

**Pas d'authentification, pas d'autorisation ni audit**

# Capacités uniques d'InsightZAP

- Processus de gestion

- Tableaux de bord

- Combinaisons de données de différents reports SAP

- Snapshots

- Boutons de fonction Out of the Box

- Couche d'autorisation supplémentaire

- Reports embarqués et données SAP tabulaires vers d'autres objets

- Éditeur On Demand

- Affichages automatiques de tous les reports sous forme d'app Fiori

- Analyses de sensibilité et simulations à l'aide de variables d'entrée

- Multiplés layouts disponibles pour le gestionnaire Métier

- Documentation automatique

- Snip reports & envois partagés via Outlook

- Permalinks
